METHOD FOR AUTOMATICALLY ADAPTING
TO THE CAPABILITIES OF A DATA-TRANSMITTING
TERMINAL A DEVICE SUPPLYING DATA TO SAID
TERMINAL REQUESTING THE DATA

Abstract

The invention concerns a method for automatically adapting to the capabilities of a data transmitting terminal a device supplying data to said terminal requesting the data. Said method is characterized in that the data supplying device receives information concerning the capabilities of the device requesting data to send to the latter the data to be transmitted in accordance with the specified capabilities.
